"We live in an area where the temperatures range from 25° below to 100° above zero, so the roof has a lot of movement and weather related stress. This process sealed our leaks, stopped the rusting and allows our students and staff to stay dry. We didn't know we were going to get increased energy efficiency when we started, but we are spending less to cool the building. We are going to have more of our buildings done with the MR System."

- Keith McMann, School Superintendent

Conklin's highly-reflective roof systems have been providing quality solutions to the roofing market since 1977.
